

IntelliVoice – The Secure Managed Voice Solution

.....Powered by Cisco

Originally designed for government agencies to address agency continuity of operations, (COOP), in the event of national disasters, **IntelliVoice** is a complete disaster recovery system built into your voice and data network. With ultimate redundancy, **IntelliVoice** provides resiliency and continuity of business communications. Our data center Physical Security design meets or exceeds the Federal Facilities Code for Anti-terrorism. In the event of inclement weather, power outage, building damage, or other emergencies, your customers will be able to communicate with you without interruption.
